

WHAT IS CLAIMED IS:

1. A waterless toilet having a disposable, biodegradable bag for catching and storing human waste for disposal, said waterless toilet comprising:

a toilet bowl;

said toilet bowl comprising a rounded lip which runs along the perimeter of the top of the toilet bowl;

a base;

a lid that is configured to be opened and closed;

a seat that is configured to be hinged so that the seat may be lifted up and away from the body of the toilet; and

said seat comprising a rounded indentation that runs along the perimeter of the bottom or underside of the seat, which rounded indentation is configured to receive the rounded lip on the top of the toilet bowl;

a hole or opening on each of the right and left sides of the body of the toilet;

a biodegradable bag for catching and storing waste for disposal;

said biodegradable bag being designed with a substantially steep angle at the back of the bag, which angle slopes downward toward the front of the bag;

said biodegradable bag comprising a string on each of the left and right sides of the bag, which strings run through the neck of the bag in a drawstring fashion.

2. A method of disposal for disposing of said biodegradable bags, said method of disposal comprising:

a disposal chute that is installed in the wall of the bathroom,

and which leads to the outside of the house;

said disposal chute leading to an underground tank system for waste disposal;

said tank system for waste disposal comprising:

a decomposing tank;

a finishing tank;

a suction pipe for taking waste from the finishing tank to the street level to be collected by a waste disposal truck.
